PROFILE

Computer Systems Technology (Predictive Analytics Option) graduate from BCIT – Graduated with Distinction, CGPA 91 – with hands-on experience in machine learning, big data analysis, and full-stack web and mobile development. Completed an 8-month IT operations co-op supporting a 650+ student school community and a 1,000+ device fleet. Former high school mathematics teacher of three years, bringing proven communication and problem-solving skills to technical teams

EDUCATION

Computer Systems Technology Diploma Program

British Columbia Institute of Technology, Vancouver, BC CGPA: 91

Graduation: June 2026

Bachelor of Education – Secondary Mathematics

The University of British Columbia, Vancouver, BC

Graduation: Aug 2020

Bachelor of Science – Combined Major in Science

The University of British Columbia, Vancouver, BC

Graduation: May 2019

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, TypeScript, C, SQL, Dart, Bash
Web and Mobile	HTML/CSS, jQuery, React, Express.js, Bootstrap, Tailwind CSS, Rest APIs (Google Maps, Google Air Quality, OpenWeather, Map API), Node.js, EJS, Firebase (Authentication, Cloud Firestore)
Databases	MongoDB, SQLite, MySQL, Microsoft SQL Server
Data Analysis	Jupyter Notebook, Pandas, NumPy, Matplotlib, Seaborn
Machine Learning	Scikit-learn, XGBoost, statsmodels (SARIMAX, Holt-Winters), PyTorch, Hugging Face Transformers, FAISS, MLflos, A2O AutoML
IT and Tools	Git/GitHub, Agile Scrum, Cisco Meraki, Mosyle MDM, PaperCut MF, Windows Print Server, macOS administration, Amazon Q CLI (now Kiro CLI), Figma

PROJECTS

DineGuide | Industry-Sponsored (<https://github.com/SungJin-Suh/DineGuide>)

Jan – May 2026

Flutter • Firebase (Authentication, Cloud Firestore) • Map API

- Built a cross-platform mobile app that helps people with Type 1 diabetes find restaurants and food items matching their nutritional needs, developed over five months of iterative feedback with an industry sponsor.
- Developed front-end and back-end features of the full authentication and profile suite – sign-up, login, two-factor authentication (2FA), password recovery, and a three-screen profile module (meal limits, nutrient priorities, password reset) – using Firebase Authentication and Cloud Firestore.
- Translated Figma designs into production Flutter screens within a three-developer split and shipped a final build approved by the sponsor.

ColorUs | Personal (<https://github.com/SungJin-Suh/colorus>)

June – Aug 2024

React • Tailwind CSS • Python (Machine Learning)

- Built a web app that analyzes a user's skin tone to predict their personal colour and recommend complementary palettes.
- Implemented the Python machine-learning model for personal-colour prediction and developed the React front end.

ProtectUs | Academic (<https://github.com/SungJin-Suh/protectus>)

May 2024

Node.js • EJS • MondoDB • Tailwind CSS

- Built a public-safety web app with synchronized map and list views of criminal data and browsable protection services; developed the EJS/Tailwind front end and the Node.js, Express, and Mongo DB back end with Google Maps integration.

CampUs | QDS Hacks 2024 (<https://github.com/SungJin-Suh/campus>)

Mar 2024

JavaScript • Tailwind CSS • Firebase

- Hackathon project: an anonymous community app for BCIT students featuring chat, a marketplace, and career resources, built with a JavaScript/Tailwind front end and Firebase authentication and data storage.

AirHealth | Academic (<https://github.com/SungJin-Suh/airhealth>)

Jan – Apr 2024

JavaScript • HTML • Bootstrap CSS • Tailwind CSS • Firebase • Google Air Quality API

- Delivered real-time air-quality data and personalized recommendations by city, integrating the Google Air Quality API with a Firebase real-time backend.

EXPERIENCE

Junior Analyst (Co-op)

Jan 2025 – Aug 2025

York House School, Vancouver, BC

- Provided frontline IT support to a 650+ student school community, resolving 25-35 tickets per week for students, staff, and parents using Web Help Desk and Jitbit ticketing systems.
- Managed 1,000+ school-owned Apple devices (MacBooks, iPads, iPhones) with Mosyle MDM, remotely deploying OS updates, applications, and configuration profiles.
- Administered campus Wi-Fi, access points, switches, and device access policies using Cisco Meraki.
- Created Bash scripts to automate routine macOS tasks across the device fleet, cutting repetitive manual work.
- Consolidated nearly a decade of undocumented legacy scripts (hundreds of files) into a categorized GitHub repository using Amazon Q CLI; authored README and screenshot-based internal guides enabling staff to clone, navigate, and contribute.
- Maintained print infrastructure on a Windows Print Server integrated with PaperCut MF/NG, managing users, quotas, and daily remote printer status checks.

Teacher on Call

Nov 2020 – Dec 2023

Richmond School District, Richmond, BC

- Taught mathematics and chemistry to classes of 25-30 secondary students, adapting same-day to new classrooms, curricula, and tools – experience now applied to communicating technical concepts clearly.

Earlier teaching roles (2017-2020): Student Teacher at Templeton Secondary School • Math & Chemistry Instructor at Elite Educational Institute
